Personal Statement

As a Lead Full Stack Developer, I have over a decade of industry experience crafting custom web solutions. I take pride in engineering high-traffic, global websites using high-quality, accessible, and performant code. In addition, I champion a Test-Driven Development approach through Pair Programming to ensure robust and reliable outcomes.

Key Skills

- 11 years of web development experience
- 5 years of tech leadership experience
- 6 years of React experience
- 5 years of Next.js experience
- 6 years of Node experience
- 2 years of GO experience

Work History

Latus Group (Contract)   January 2025 - March 2025

React Native Developer | *Typescript, React, React Native, Expo, Storybook*

Worked in collaboration to create a healthcare application which included a booking system. I was one-half of the development team, working on another bespoke application to perform health tests in work environments.

CodeComputerLove (Contract)   November 2024 - December 2024

Senior Frontend Developer | *Typescript, React, Next.js, Azure, Storybook*

Creating a new website for The Crown Estate. The website's look and feel have been created using a design system and design tokens in mind whilst adhering to AAA standards for accessibility. In addition, it uses DatoCMS to enable non-developers to change content on the website.

F!NH (Contract)   April 2024 - November 2024

Lead React Native Developer | *Typescript, Deno, React, React Native, SQL*

Sole application developer for a greenfield social media aggregator project. This project also includes a greenfield backend project built using Deno and PostgreSQL. This supports the applications' user settings, authentication, scheduling and additional user-to-user interaction.

Tree3 (Contract)   April 2024 – October 2024

Senior Full Stack Developer | *Typescript, Node, React, Next.js, Sendgrid, Inngest, Playwright*

One-half of the development team created a greenfield affiliate platform to enable custom marketing to drive sales by including affiliate programs and offers. This platform is live and active in the US.

Ensono Digital   November 2022 – March 2024

Senior Frontend Consultant | *Typescript, Node, React, Next.js, AWS, Azure, PostgreSQL, Storybook*

Spearheaded an award-winning custom SSR e-commerce solution for a large gym company and guided a front-end team to create a custom SSR admin application, part of a multi-team banking project. Both projects focused on A11y using AXE and Cypress whilst maintaining high-quality code via Jest with Testing Library.

Part of the open-source project team created a scaffold CLI system using NX, which would become the template for all future front-end projects. This project reduced the time to the initial MVP by half.

An overwhelming majority appointed me the Front-end competency Chair for all department meetings, which included creating and orchestrating ceremonies for the department. Furthermore, I was the line manager for multiple front-end engineers, aiding them in progressing through the company whilst giving interpersonal and technological advice.

Cinch   April 2021 – November 2022

Senior Full Stack Developer | *Typescript, Node, React, Next.js, Redux, AWS, DynamoDB, Storybook*

Tailoring existing features on the website following TDD and AAA A11Y practices via React and Typescript linked with an AWS micro-service architecture backend. Code was deployed using GitHub Actions' CI/CD pipeline. Releases frequent and small iterative UI changes via A/B testing to enable a data-driven approach to determining successful changes

When creating features for the website, it emphasised using O11y to ensure an excellent customer experience when releasing them. Kanban and pair programming were the software methodologies that allowed high-quality coding standards. I was also a major contributor to the mentorship program by mentoring junior developers on the many squads I was part of. Lastly, I organised working groups for the technical department and kata meetings for fellow engineers.

Mercarto   May 2020 – April 2021

Senior Full Stack Developer | *Typescript, GO, Node, React, Next.js, React Native, Nest.js, GCP, MySQL, MongoDB*

Created an e-commerce platform to enable store creators to create a virtual store. This was architected to use Microservices for bespoke e-commerce features and tailored a robust admin UI via a BDD approach.

Bet365 — Jul 2019 - May 2020

Full Stack Developer | *Typescript, React, GO, MSSQL, Riak (No SQL)*

When I was working at Bet365, I actively developed the sports website that is used by millions of people a day. My main deliverable was to add offers on the sports website and sports app.

Codeweavers — Sept 2016 - Jul 2019

Front-end Developer | *Javascript, Typescript, Node, C#, Angular, React Native*

At Codeweavers, I worked with the Front-end development team on internal platform tools and websites, a bespoke e-commerce website for a car company, an iframe finance plugin for all showroom websites and, in addition, a proposal and lead generator platform for car manufacturers and lenders in the motor industry. The company used XP to deliver its high-quality, maintainable code with regular katas and coding exercises to ensure every developer adheres to the best practices.

Digital Balance — Nov 2015 - Sept 2016

Junior Front-end Developer | *Javascript, Node, SQL*

At Digital Balance, I worked with a team of developers to design, build and maintain e-learning platforms for large clients using Laravel and JQuery.

Bright Future Software — Jul 2014 - Nov 2015

Apprentice Software Developer | *HTML, CSS, Javascript, SQL*

A mixture of hands-on experience and education certifications while working in an Agile methodology. I studied towards a Level 3 in IT and learned about web development and project management. Furthermore, I was part of a team that created an internal timekeeping project.

Creative Council — Jun 2012 - Nov 2012

Web Assistant | *HTML, CSS, WordPress*

Worked solo to maintain clients' projects by maintaining WordPress and the web server whilst changing designs via Dreamweaver.

Hobbies and Activities

- Former Semi-Professional Dota2 Player and World record speedrunner
- Coffee Enthusiast and Electronic music maker
- Hockey player for North Stafford Hockey Club (NSHC)

Community and Certifications

- Node.js Application Developer Certification
- A regular speaker at technology meetups in Stoke-on-Trent and Manchester
- A 5-star top 5% Mentor on MentorCruise - a mentorship platform
